

Amendments to the Specification:

Please replace the title appearing on page 1, line 1 with the following substitute title:

Local Information Provision of Local Data In A Wireless System

Please replace the abstract appearing on page 13 with the following substitute abstract:

ABSTRACT

LOCAL INFORMATION PROVISION

A local data provision system comprising: a plurality of transmitters each located at a respective entity having a limited range of physical utility, and each transmitter being arranged repeatedly or on demand to transmit wirelessly a signal carrying data indicating the presence of the respective entity over a range substantially coterminous with the range of utility of that entity; and a personal information unit comprising a user interface for signaling information to a user and a receiver arranged to receive the availability data and to cause the user interface to signal information to the user in dependence on the received availability data.
